

### SET UP 1

Swivel out the bottom bracket to 90 degree, open the case hood and take out the accessories.

### SET UP 2

Position the black plastic behind the case to the centre (marked the hole on the bracket.)

### SET UP 3

Securely insert the 3 section aluminium telescopic pole through the plastic base housing into the top round plastic cap fitted into the bottom bracket.

### SET UP 4

Pull up the top profile of the graphic panel and hook it onto the top of the telescopic pole. Extend the telescopic pole section by section, locking each piece in place with a single turn, to the desired height.

### REPLACE 1

Open the case hood and carefully pull out the graphic panel to it's fullest extent (until you see the white clip). Insert the locking pin into the hole at the side of the bottom case, make sure it is fully inserted, this will lock the spring coil tube in place. In the event of difficulty locating the pin hole, turn the spring coil tube a little until you can locate the hole.

Locking Pin

### REPLACE 2

Remove the graphic panel together with the white plastic clip from the track in the spring coil tube. Remove the graphic panel from the white plastic clip.

### REPLACE 3

The new design of ilook rollup. The top clamp bar is designed to simplify the top banner fixing work. Just open the clamp bar and slide in the banner straight and close up. (No more tapes work)

Locking Pin

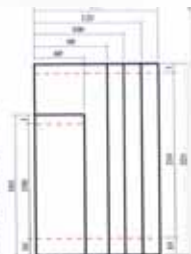

#### Please note:

Do not remove the locking pin before installing the new graphic panel, this will allow the spring coil tube to uncoil and lose it's pressure. If this does occur, simply turn the spring coil tube about 25 rotations (for IK-90,100,120,150) and re-fit the locking pin. (Remark: 20 rotations for IK-60)

#### Product Description

Item No.	Spec.	N.W	Visible Display Size		Graphic Printing Size	
			W	H	W	H
IK-40	40cm	2.2 kg	40cm	150cm	40cm	160cm
